

Do you take an optimistic view on AI?

two minutes, 10 questions, thank you!

1. Role

- ☐Students
- ☐Others

2. Age

- ☐20-29
- ☐30-39
- ☐Over 40

3. Educational background (studying or obtained)

- ☐Bachelor
- ☐Master
- ☐Doctor

4. Major subject in high school

- ☐Arts
- ☐Sciences

5. Gender

- ☐Male
- ☐Female

6. Attitude towards Alpha Go/Master/Zero?

- ☐Excited
- ☐Afraid
- ☐Unconcerned

7. In 20 years, when AI can complete most of the mechanical work of human beings, which is most of the non-design work, what do you think of the trend that human work is gradually replaced? (your attitude towards mechanical work is gradually replaced in 20 years?)

- ☐large number of people will not be able to find a job, the society will be chaotic,

expressed concern

○Some worry, in solving the problem of employment and at the same time slow development, but still optimistic

○No much worry, humans will be engaged in more design work, to avoid waste of manpower resource

8. What do you think of it if, in another 40 years, AI has developed to the point where it has self-consciousness, independent thinking and judgment, and can complete certain design work, such as programming/painting/writing? (your attitude towards design work is gradually replaced in 40 years?)

○Excited, life will be more interesting and comfortable, not too worried

○Afraid, very worried about human being dominated by AI

○Unconcerned, as AI is a friend of human

9. In more than a hundred years, AI has really developed beyond human ability to complete many tasks that humans cannot complete, such as completing novels in a short time and completing scientific research. What do you think? (your attitude towards AI will be beyond human beings in 100 years?)

○Human will be dominated by AI

○Human will be freedom without much limitation

10. If you can determine the development degree of AI in 100 years, what degree do you think is appropriate (the degree of AI you think should be in 100 years?)

○Over mechanical work

○With the ability of thinking and learning

○With the same ability as human beings

○Beyond human beings

你看好 AI 吗？

两分钟，10 个问题，谢谢！

1. 角色

☐ 学生

☐ 其他

2. 年龄

☐ 20-29

☐ 30-39

☐ 40 以上

3. 在读或已取得学历

☐ 本科

☐ 硕士

☐ 博士

4. 高中的学科偏向

☐ 文科

☐ 理科

5. 性别

☐ 男

☐ 女

6. 对 Alpha Go/Master/Zero 等目前 AI 水平的态度？

☐ 兴奋高兴鼓励

☐ 害怕担心反对

○无所谓没感觉

7. 再过二十年，AI 已经能完成大部分人类的机械劳动时，能完全大部分非设计性工作，你怎么看人类工作逐渐被代替的趋势？

○大量人将找不到工作，社会会混乱，表示担忧

○有些担心，在解决人员就业同时缓慢发展，但还是看好

○不太担心，人类将从事更具设计性的工作，避免了人力浪费

8. 如果再过四十年，AI 发展到有了自我意识，有自己独立的思考和判断，能完成一定设计性工作，如编程/绘画/写作，你怎么看？

○兴奋，生活将更加有趣与舒适，不太担心

○惶恐，很担心人类被 AI 支配

○无所谓，有没有都行，就当 AI 是普通人，是朋友

9. 再过一百年以上，AI 真的发展到超越人类能力，能完成许多人类无法完成的工作，如短时间完成小说，完成科学研究等，你怎么看？

○人类的灭亡，人类被 AI 支配的时代

○人类的解放，人类终于能实现自我理想

10. 如果你能决定一百年后 AI 发展的发展程度，你觉得什么程度比较合适

○完成机械工作即可

○有思考和学习能力

○能力与人类差不多

○超越人类
